- ANNEX I: STANDARD PET 48/40 NECK BOTTLE**
- ANNEX II: OVERALL DIMENSION**

1. APPLICABLE PRODUCTS

This document applies for Vitop Hydro taps, in all validated color versions.

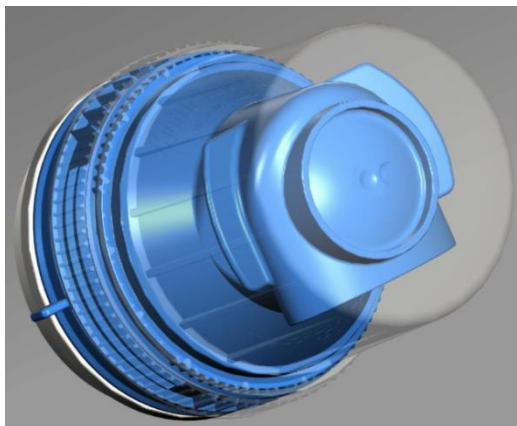

Figure 1: Hydro tap.

Composition:

Taps are made of two components plus the cap.

Materials used to manufacture the components of Vitop Hydro taps are reported in the following table:

Component	Material	Lubricant	Masterbatch
Body	Polypropylene (PP)	NO	YES
Cap	Polypropylene (PP)	NO	NO
Valve	Polyoxymethylene (POM)	NO	NO

2. RESPONSIBILITY AND WARRANTY

Performance of Hydro taps is under the responsibility of Vitop, but Vitop cannot be considered responsible for any improper use of its products by the buyer and/or the final consumer.

The period of delivery of the Hydro taps by Vitop and their installation on the container by the manufacturer shall not exceed six months. Also, the period between delivery of Hydro taps by Vitop to the container manufacturer and their use by the final consumer must not exceed two and half years.

3. REFERENCE CERTIFICATION

Vitop guarantees the performance of its products through an appropriate Quality System and internal procedure certified by:

- UNI EN ISO 9001:2008
- UNI EN ISO 22000:2005

Moreover, the assembly area of the taps is kept very clean, meeting the norms of production of packaging materials intended to come into contact with food.

Food contact and others statements:

Vitop Hydro taps are suitable to come into contact with food.

Specific statements for food contact, as well as for REACH, heavy metals and the environment, are provided by Vitop on request.

4. TECHNICAL INFORMATION

Vitop Hydro tap fits standard PET 48/40 neck bottle; technical drawing of the finish neck is reported in annex I.

Overall dimensions of Vitop Hydro tap are provided in annex II.

5. PACKAGING AND STORAGE SPECIFICATION

Vitop Hydro taps are adequately packed and sent to the customer on pallets of 30 cardboard boxes (400 units per box) with protective adhesive tape (quality Seal).

5.1 Packaging identification

Each cardboard box is identified with a proper label and with an identification code that indicates:

- Vitop's address
- Vitop's article code
- Vitop's SAP code
- Quantity per box
- Production date
- Line number
- Box number
- Traceability code

In order to guarantee a correct traceability system, the identification code must be registered in the daily production records by the customers.

SUPPLY TECHNICAL SPECIFICATION – VITOP HYDRO TAPS		

5.2 Storage specification

The temperature of the area where the Vitop Hydro taps are stocked shall be room temperature (over 4°C and less than 30°C).

In order to prevent defects to the box/product, no pallet can be put on another one.

Vitop also suggests to use FIFO for the stock management.

As the regulations and products mentioned in this statement change over time, Vitop advises its customers to ask for a new declaration periodically. This declaration cancels any previous version.
